Springer

# Contents

## Part I Basic Knowledge

<b>1</b>	<b>Introduction of Data Center</b>	3
1.1	Evolution of Data Centers	3
1.1.1	Basic Concept and Intuitive Classification	3
1.1.2	Demands for Data Centers from Cloud Computing	6
1.1.3	Demands for Data Centers from Big Data Applications	8
1.1.4	The Development of New Generation Data Centers	9
1.2	Fundamental Services Offered by Data Centers	13
1.2.1	Storage Service	13
1.2.2	Computing Services	14
1.2.3	Big Data Applications	15
1.3	Challenges for Data Center Networks	17
1.3.1	Customization of Network Functionality	18
1.3.2	High Scalability of Data Center Networks	19
1.3.3	Efficient Multiplexing of Network Resources	20
1.3.4	Network Virtualization of Data Centers	21
1.3.5	Cooperative Transmission of Correlated Traffic	22
	References	23
<b>2</b>	<b>State-of-the-Art DCN Topologies</b>	25
2.1	Introduction	25
2.2	Switch-Centric DCN Topologies	27
2.2.1	Tree-Like Topologies	28
2.2.2	Flat Topologies	30
2.2.3	Optical Switching Topologies	33
2.3	Server-Centric DCN Topologies	36
2.3.1	Compound Graph-Based DCN Topologies	36
2.3.2	Non-Compound Graph-Based DCN Topologies	39

2.4	Modular DCN Topologies .....	41
2.4.1	Intra-module Network Topology .....	41
2.4.2	Inter-module Network Topology .....	42
2.5	Random DCN Topologies .....	43
2.5.1	Small-World Network-Based DCN Topology .....	45
2.5.2	Random Regular Graph-Based DCN Topology .....	45
2.5.3	Scale-Free Network-Based DCN Topology .....	46
2.6	Wireless DCN Topologies .....	48
2.6.1	60 GHz-Based Hybrid DCN Topology .....	48
2.6.2	60 GHz-Based Wireless DCN Topology .....	49
2.6.3	FSO-Based DCN Topology .....	50
2.6.4	VLC-Based DCN Topology .....	50
2.7	Evolution and Future Trends of DCN Topology Design .....	51
2.7.1	Evolution of DCN Topology Design .....	51
2.7.2	Future Trends of DCN Topology Design .....	52
	References .....	53

## Part II Novel Data Center Network Structures

<b>3</b>	<b>HCN: A Server-Centric Network Topology for Data Centers .....</b>	<b>59</b>
3.1	Introduction .....	59
3.2	The Design of HCN Topology .....	61
3.2.1	Basic Theories of the Compound Graph .....	61
3.2.2	The Construction Methodology of HCN .....	63
3.3	The Design of BCN Topology .....	65
3.3.1	Description of BCN Topology .....	65
3.3.2	The Construction Methodology of BCN .....	67
3.4	Routing Mechanism of BCN .....	71
3.4.1	Single-path for the Unicast Traffic .....	71
3.4.2	Multi-paths for Unicast Traffic .....	73
3.4.3	Fault-Tolerant Routing in BCN .....	75
3.5	Performance Evaluation .....	78
3.5.1	Network Order .....	78
3.5.2	Low Network Diameter and Server Degree .....	80
3.5.3	Connectivity and Path Diversity .....	80
3.5.4	Evaluation of the Path Length .....	82
3.6	Discussion .....	84
3.6.1	Extension to More Server Ports .....	84
3.6.2	Locality-Aware Task Placement .....	84
3.6.3	Impact of the Server Routing .....	84
	References .....	85

<b>4</b>	<b>DCube: A Family of Network Topologies for Containerized Data Centers</b>	<b>87</b>
4.1	Introduction	87
4.2	The DCube Topology	89
4.2.1	Design Idea of DCube	89
4.2.2	H-DCube	90
4.2.3	M-DCube	91
4.3	Single-Path Routing for the Unicast Traffic	92
4.3.1	Single-Path Routing in H-DCube	93
4.3.2	Single-Path Routing in M-DCube	94
4.4	Multi-paths Routing for the Unicast and Multicast Traffic	97
4.4.1	Multi-path Routing for the Unicast Traffic in H-DCube	98
4.4.2	Multi-path Routing for the Unicast Traffic in M-DCube	99
4.4.3	Speedup for the Multicast Traffic	101
4.5	Analysis and Evaluation	102
4.5.1	Speedup for the Unicast and Multicast Traffic	103
4.5.2	Aggregate Bottleneck Throughput	104
4.5.3	Qualification of Cost and Cabling Complexity	105
4.5.4	Summary	108
4.6	Discussions	108
4.6.1	Locality-Aware Task Placement	108
4.6.2	Extension to More Server Interfaces	108
4.6.3	Impact of Server Routing	109
	References	109
<b>5</b>	<b>R3: A Hybrid Network Topology for Data Centers</b>	<b>111</b>
5.1	Introduction	111
5.2	The Design Methodology of Hybrid Topologies	112
5.2.1	Overview of Network Topologies	113
5.2.2	R3: A Hybrid Topology Based on the Compound Graph Theory	114
5.2.3	Deployment Strategy for Data Centers with a Hybrid Topology	117
5.3	Efficient Routing Methods of R3	117
5.3.1	Edge Coloring Based Identifier Allocation	118
5.3.2	Identifier-Based Routing Algorithm	119
5.4	Topology Optimization	121
5.4.1	Impact Factors of the R3 Topology	122
5.4.2	Optimization Strategy of Topologies	122
5.5	Incremental Expansion of R3	124
5.5.1	Expansion within an Existing Random Cluster	125
5.5.2	Expansion by Adding an Extra Random Cluster	125

5.6	Performance Evaluation .....	127
5.6.1	The Routing Flexibility .....	127
5.6.2	The Cabling Cost .....	128
5.6.3	The Network Performance .....	129
5.7	Discussion .....	130
	References .....	131
<b>6</b>	<b>VLCCube: A Network Topology for VLC Enabled Wireless Data Centers</b> .....	<b>133</b>
6.1	Introduction .....	133
6.1.1	Motivation .....	133
6.1.2	Related Work .....	135
6.2	The Design of VLCCube .....	136
6.2.1	Feasibility of Introducing VLC Links into DCNs .....	136
6.2.2	The Interference Among Transceivers .....	137
6.2.3	Topology Design of VLCCube .....	138
6.3	Routing and Congestion Aware Flow Scheduling in VLCCube .....	142
6.3.1	Hybrid Routing Scheme in VLCCube .....	142
6.3.2	Problem Formulation of Flow Scheduling .....	143
6.3.3	Scheduling the Batched Flows .....	144
6.3.4	Online Scheduling of Flows .....	147
6.4	Performance Evaluation .....	149
6.4.1	Settings of Evaluations .....	149
6.4.2	Topological Properties of VLCCube .....	150
6.4.3	Network Performance Under Trace Flows .....	151
6.4.4	Network Performance Under Stride-2 $k$ Flows .....	152
6.4.5	Network Performance Under Random Flows .....	153
6.4.6	Impact of Congestion Aware Flow Scheduling .....	154
6.5	Discussion .....	155
	References .....	156
<b>Part III Traffic Cooperation Management in Data Centers</b>		
<b>7</b>	<b>Collaborative Management of Correlated Incast Transfer</b> .....	<b>161</b>
7.1	Introduction .....	161
7.2	In-Network Aggregation of an Incast Transfer .....	163
7.2.1	Feasibility of the Inter-flow Data Aggregation .....	163
7.2.2	Minimal Incast Tree .....	165
7.2.3	Inter-flow Data Aggregation on an Incast Tree .....	166
7.3	Efficient Building Method of an Incast Tree .....	166
7.3.1	Online Construction of an Incast Tree .....	168
7.3.2	Construction of the Minimal Incast Tree .....	171
7.3.3	Dynamical Behaviors of Senders .....	173
7.3.4	Dynamical Behaviors of the Receiver .....	173

7.4	Discussion	174
7.4.1	Extension to General Incast Transfers	174
7.4.2	Extension to Other Network Topologies	175
7.4.3	Impact on the Job Execution Time	175
7.5	Performance Evaluation	176
7.5.1	The Prototype Implementation	176
7.5.2	Impact of the Data Center Size	178
7.5.3	Impact of the Incast Transfer Size	179
7.5.4	Impact of the Aggregation Ratio	180
7.5.5	Impact of the Distribution of Incast Members	182
	References	183
<b>8</b>	<b>Collaborative Management of Correlated Shuffle Transfer</b>	<b>185</b>
8.1	Introduction	185
8.2	In-Network Aggregation of Shuffle Transfers	186
8.2.1	Problem Statement	186
8.2.2	Construction of an Incast Aggregation Tree	188
8.2.3	Construction of a Shuffle Aggregation Subgraph	192
8.2.4	The Fault-Tolerance of Shuffle Aggregation Subgraph	195
8.3	Scalable Forwarding Schemes for Performing In-Network Aggregation	196
8.3.1	General Forwarding Scheme	196
8.3.2	In-Switch Bloom Filter Based Forwarding Scheme	197
8.3.3	In-Packet Bloom Filter Based Forwarding Scheme	198
8.4	Performance Evaluation	200
8.4.1	The Prototype	200
8.4.2	Impact of the Data Center Size	201
8.4.3	Impact of the Shuffle Transfer Size	203
8.4.4	Impact of the Aggregation Ratio	204
8.4.5	The Size of Bloom Filter in Each Packet	206
	References	207
<b>9</b>	<b>Collaborative Management of Uncertain Incast Transfer</b>	<b>209</b>
9.1	Introduction	209
9.2	Overview of Aggregating Uncertain Incast Transfer	211
9.2.1	Problem Statement of Uncertain Incast Transfer	211
9.2.2	Aggregating a Deterministic Incast Transfer	212
9.2.3	Aggregating an Uncertain Incast Transfer	213
9.3	Aggregation Tree Building Method for Uncertain Incast Transfer	214
9.3.1	The Diversity of In-Network Aggregation Gain	215
9.3.2	Initializing Senders for an Uncertain Incast Transfer	215
9.3.3	Aggregation Tree Building Method for Uncertain Incast	220

9.4	Performance Evaluation .....	223
9.4.1	Evaluation Methodology and Scenarios .....	223
9.4.2	Impact of the Incast Transfer Size .....	224
9.4.3	Impact of the Data Center Size .....	226
9.4.4	Impact of the Aggregation Ratio .....	227
9.4.5	Impact of Distributions of Incast Members .....	228
9.4.6	Impact of the Receiver Diversity .....	230
	References .....	231
<b>10</b>	<b>Collaborative Management of Correlated Multicast Transfer .....</b>	<b>233</b>
10.1	Introduction .....	233
10.2	Related Work .....	235
10.3	Problem Statement of Uncertain Multicast .....	236
10.3.1	Observations .....	236
10.3.2	Problem Statement .....	238
10.3.3	Mixed Integer Linear Programming .....	239
10.4	Efficient Building Methods of MCF .....	241
10.4.1	Primary Approximation Method .....	241
10.4.2	Enhanced Approximation Method .....	244
10.5	Performance Evaluation .....	247
10.5.1	Implementation of the Uncertain Multicast in SDN Testbed .....	247
10.5.2	Evaluation Based on Small-Scale Experiments .....	248
10.5.3	Evaluation Based on Large-Scale Simulations .....	251
	References .....	255

# GreenEdge: New Perspectives to Energy Management and Supply in Mobile Edge Computing

 Springer

# Contents

<b>1</b>	<b>Introduction</b>	1
1.1	When 5G Meets Edge Computing	1
1.2	The Energy Dilemma	2
1.3	Key Problems and Contributions	3
1.4	Content Organization	4
<b>2</b>	<b>Investigating Low-Battery Anxiety of Mobile Users</b>	7
2.1	Introduction	7
2.2	Related Work	9
2.3	A Survey Over 2000+ Mobile Users	10
2.4	Quantification of Low-Battery Anxiety	11
2.4.1	Extraction of LBA Curve	11
2.4.2	Observations and Analysis	12
2.4.3	Lessons Learnt from LBA Quantification	15
2.5	Impacts of LBA on Video Watching	15
2.5.1	Extraction of Video Abandoning Likelihood Curve	15
2.5.2	Observations and Analysis	16
2.5.3	Advice for Video Streaming Services	19
2.6	Ethics	19
2.7	Conclusion	19
<b>3</b>	<b>User Energy and LBA Aware Mobile Video Streaming</b>	21
3.1	Introduction	21
3.2	Background and Related Work	24
3.2.1	Background of Low-Battery Anxiety	24
3.2.2	Background of Display Power Saving	24
3.2.3	Work Related to This Work	25
3.3	LBA Survey and Modelling	26
3.3.1	Data Collection	26
3.3.2	LBA Curve Extraction	27
3.3.3	Insights on LBA Alleviation	28

3.4	LPVS: Low-Power Video Streaming .....	28
3.4.1	Scenario Overview .....	28
3.4.2	Models for Power Consumption in Video Streaming .....	30
3.4.3	Models for Energy Status and Low-Battery Anxiety .....	31
3.4.4	Video Streaming Capacity at the Edge .....	32
3.4.5	Joint Optimization for Energy Saving and Anxiety Reduction .....	32
3.5	Solution Methodology .....	33
3.5.1	The Difficulties .....	33
3.5.2	Information Compacting .....	33
3.5.3	A Two-Phase Heuristic for Joint Optimization .....	35
3.5.4	Determine $\gamma_n$ with Bayesian Inference .....	36
3.6	LBA Model Updating .....	38
3.6.1	Analysis of LBA Heterogeneity .....	38
3.6.2	Local LBA Model Updating .....	38
3.7	Implementations .....	40
3.7.1	Real-World Video Streaming Traces .....	40
3.7.2	LPVS Emulation and Setups .....	41
3.8	Performance Evaluations .....	43
3.8.1	LPVS with Sufficient Edge Resource .....	43
3.8.2	LPVS with Limited Edge Resource .....	44
3.8.3	Impact of LPVS on Low-Battery Users .....	45
3.8.4	LPVS with Updated LBA Models .....	46
3.8.5	Overhead of LPVS and Impact on Other QoE Metrics .....	47
3.9	Conclusion .....	48
<b>4</b>	<b>Optimal Backup Power Allocation for 5G Base Stations .....</b>	<b>51</b>
4.1	Introduction .....	51
4.1.1	Spatial Dimension .....	52
4.1.2	Temporal Dimension .....	53
4.2	Related Work .....	53
4.3	BS Power Measurements and Observations .....	54
4.3.1	Power Consumption of 4G and 5G BSs .....	54
4.3.2	Power Consumption of 5G BS Major Components .....	55
4.3.3	Multiplexing Gain with Backup Power Sharing .....	55
4.4	System Model .....	57
4.4.1	Scenario Overview .....	58
4.4.2	Traffic Load and Power Demand .....	59
4.5	Optimal Backup Power Allocation .....	59
4.5.1	Analysis of Power Outages and Network Failure .....	59
4.5.2	Condition of Network Reliability .....	61
4.5.3	Backup Power Deployment Constraints .....	62
4.5.4	Backup Power Allocation Optimization .....	62

4.6	Experimental Evaluations .....	63
4.6.1	Experiment Setup .....	63
4.6.2	Results and Analysis .....	63
4.7	Conclusion .....	65
<b>5</b>	<b>Reusing Backup Batteries for Power Demand Reshaping in 5G .....</b>	<b>67</b>
5.1	Introduction .....	67
5.2	System Models .....	69
5.2.1	Scenario Overview .....	69
5.2.2	BS Power Supply and Demand .....	70
5.2.3	Battery Specification .....	71
5.3	Power Demand Reshaping via BESS Scheduling .....	71
5.3.1	Energy Cost with BESS .....	72
5.3.2	Battery Degradation Cost .....	73
5.3.3	Optimal BESS Operation Scheduling .....	74
5.3.4	Problem Analysis .....	75
5.4	A DRL-Based Approach to Distributed BESS Scheduling .....	77
5.4.1	DRL Based BESS Scheduling: Components and Concepts .....	77
5.4.2	Reward Function Design .....	78
5.4.3	Learning Process Design .....	78
5.5	Experimental Evaluations .....	81
5.5.1	Experiment Setup .....	81
5.5.2	General Performance at Cost Reduction with BESS .....	83
5.5.3	Case Studies of DRL-Based BESS Scheduling .....	85
5.5.4	ROIs of Different BESS Deployments .....	86
5.6	Related Work .....	87
5.6.1	General System Peak Power Shaving with BESS .....	87
5.6.2	DC Peak Power Shaving with Centralized BESS .....	88
5.6.3	DC Peak Power Shaving with Distributed BESS .....	88
5.7	Conclusion .....	89
<b>6</b>	<b>Software-Defined Power Supply to Geo-Distributed Edge DCs .....</b>	<b>91</b>
6.1	Introduction .....	91
6.2	Architecture of Software-Defined Power Supply (SDPS) .....	92
6.2.1	Motivation and Design Rationales .....	93
6.2.2	Architecture Design .....	93
6.3	Two-Phase Optimization in Software-Defined Power Supply .....	95
6.3.1	System Model .....	95
6.3.2	Phase-I: Constructing Green Cells .....	96
6.3.3	Phase-II: BESS Discharging/Charging Operations .....	97
6.4	Experimental Evaluations .....	99
6.4.1	Experiments Setup .....	99
6.4.2	Performance Comparison .....	99
6.5	Conclusion .....	101

<b>7 Conclusions and Future Work</b> .....	103
7.1 Conclusions .....	103
7.2 Future Work .....	103
<b>A Questionnaire of LBA Survey and Collected Answers</b> .....	105
<b>Bibliography</b> .....	109
